Spppplied by letter of probably 7/27/77, not dated.

Previously withheld Serial 3509. Hoover's 4/13/68 request of AG for "technical" and "microphone surveillance" at Pepper and home and Grapevine tavern. Also, Previously withheld Rosen to DeLoach 5/9/68 recommending it. Rosen said this would ease "tensions" on national security! And he says Jimmy closer to John and Carol than Jerry after they knew Jimmy had looked Jerry up -only Jerry. This means they had Jerry covered, if not themselves then through local police

Lab stuff, Bulky Serial 5586, must be gone over with care. It includes what had been withheld. Kilty, who swore to compliance without giving us NAA material, added a note on an (upper left-hand corner) Lab worksheet we did not get in this form that reads "NAA 'raw data' placed in Bulky JWK 4/5/77." Is that where the JFK stuff is? It shows distribution of copies where we did not know before, on lab work-here 4 besides two in lab with Nos. 7410 and office, which I take to be lab, 7133.
